PURPOSE-BUILT TO A HIGHER STANDARD.

Working in the forest is demanding, and your equipment needs to be up to the challenge. When you go with rugged Volvo wheel loaders and excavators — purpose-built for forestry applications — you get superior boom and arm construction and powerful engines, plus smooth hydraulics that keep you up and running comfortably shift after shift.

At Rudd Equipment, we support the construction and forestry industries with 13 service branches across nine states. Along with our award-winning master technicians, we can deliver equipment, replacement parts and service to your site by the next morning. It's that kind of 24/7 service that proves how committed Rudd is to going the distance for you. **Call your nearest Rudd location for your heavy equipment needs or visit us at ruddequipment.com.**

Letter From The **PRESIDENT**

Welcome to the Ohio Forestry Association (OFA) 2023 Paul Bunyan Show—one of the largest and oldest forest-industry shows in the country!

The Paul Bunyan Show is an annual celebration of Ohio's forest products, and the diverse group of people who ensure it remains a major industry in the Buckeye state. The Ohio forest products industry is a vital part of the state economy, employing over 124,000 individuals and contributing over \$28 billion in economic activity.

We hope you enjoy the roughly 140 vendors showcasing their most-exciting products—including many live equipment demonstrations. Remember to check out our educational sessions held in the Education Hall. Also, enjoy the fun and entertainment of the Great Lakes Timber Show and lumberjack competitions. The wood auction will be held Sunday at 2:00 p.m., and is the perfect opportunity to buy lumber, live-edge slabs and more.

While strolling the show, be on the lookout for several of your favorite internet personalities, who have traveled here to showcase the show on their channels and meet with their fans. When you get hungry follow your nose to one of the many food vendors where you can enjoy Bunyan Burgers, BBQ, homemade ice-cream and more (see the full list of options on page 23).

Please take a moment to stop by the OFA booth to say "hello," and to get some great Paul Bunyan Show merchandise. While there, take your best guess at the board footage of the logs on the truck for a chance to win half the pot! All proceeds support the OFA Foundation and its programs, including Camp Canopy—a week-long camp for high-school students interested in learning more about forestry and wildlife—as well as numerous college scholarships and charitable grants.

On behalf of the sponsors, exhibitors, vendors, dedicated staff, and members of the Ohio Forestry Association, we are glad you're here and hope you have a wonderful time!

Sincerely,

Jeff Jenkins, President
Ohio Forestry Association

IN MEMORIUM Emmett Conway Jr.

March 9, 1948 - January 20, 2023

It is with heavy hearts that we fondly remember Emmett Conway Jr. who passed away on January 20th, 2023 at the age of 74.

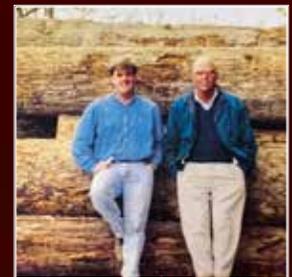

Emmett was the founder and CEO of Superior Hardwoods of Ohio, Inc. and worked his entire life to improve and grow the family business. His greatest passions were his family, friends, fishing, golfing and forestry. He loved a compelling conversation, sharing wisdom and helping others realize their full potential. He always made sure to give back to the local communities and to live life to the fullest. And anyone who knew him knew ... he had the best laugh.

He was a past president of the Ohio Forestry Association, and was a true friend and mentor to many. Emmett volunteered countless hours to the betterment of OFA and will be remembered warmly for his dedication to the Paul Bunyan Show, which would not be the best logging equipment trade show in the eastern United States without him.

The Paul Bunyan Show Little Logger Playground has been renamed in honor of Emmett. It will now be called the **Emmett Conway Little Logger Playground.**

The family asks that donations be made to the **Ohio Forestry Association Foundation c/o the Emmett Conway, Jr. Memorial Fund.**

Please share your favorite memory of Emmett in his online memorial at tinyurl.com/76sjxrpk.

Emmett's full obituary can be read at www.cardaras.com.

The DINO RXT series of self-propelled MEWPs is the right choice whenever there is a need to work on soft or inclined ground, or whenever there are weight restrictions in the work site. Boasting 92 and 72 feet of working height respectively, this machine conquers every arborist job with ease. The powerful Kubota engine combined with the low overall weight and low center of gravity of the machine allows to move easily even if ground conditions are difficult. Automatic leveling in up to 8° inclination adds to the versatility of the machine.

WOOD AUCTION

RUGGED.

Precision chippers are built stronger than the competition, and have a reputation for trouble-free service.

Our spout design with a flat bottom and canted side gives 25% more anvil contact with the log. This provides absolute control of the log, preventing slapping and wood turning. Both horizontal and vertical anvils give additional life with less maintenance.

Since 1964, Precision Husky Corporation has lead the industry, producing the highest quality, most rugged equipment available. You can invest in our equipment with confidence, and know it will perform for many years to come. Call us today to discuss your needs, as well as the newest options available for our line of sawmill, logging and wood waste recycling equipment.

**ENGINEERED FOR PERFORMANCE.
BUILT FOR ENDURANCE.**

FRIDAY & SATURDAY: 11:00 PM - 1:00 PM

Growing up out in the sticks, Buckin' learned his way around a power saw a young age. Taught to him by a local logger, his love of the bush and power saws had him bucking and selling firewood, then to falling timber, to appearances on the History Channel's Ax Men and a successful brand and YouTube channel with nearly half a million subscribers. The *smartest way* through the woods

HARD IRON THAT THINKS HARD.

You know better than anyone that your iron needs to be both hard and smart to keep the timber moving. John Deere forestry technologies offer fast, accurate diagnosis of machine issues, rapid service response, and production tracking to maximize your efficiency and productivity. With real-time mapping, jobsite machine management, and more, we know the smartest way through the woods. To learn more, contact us today.

700 YDS. / HR.*

WHO DOES THAT?

*700 yds./hr. based on initial grind, 6"-8" screen setup.

Terex CBI owners, that's who. The #1 reason grinder owners buy? Throughput. And, any way you slice it, Terex CBI grinders are engineered to own the production market. The CBI 6800CT horizontal grinder delivers on the other three purchase-decision variables too—serviceability, reliability and support.

“The CBI 6800CT’s production rate is great. Morbark 6400 finish grind was 180 yards an hour. The CBI is right around 300.

Matt Brun | Champion Landscape Equipment and Supply

Learn how Champion Landscape and Supply dialed in huge throughput increases, and an over-20% increase in operating margins with their CBI grinders.
