# LETTER FROM THE PRESIDENT

It is an honor, as President of the Ohio Forestry Association, to welcome you to the 62nd annual Paul Bunyan Show! Celebrated as one of the largest and oldest consecutively run forest industry shows in the United States, our legacy is a tribute to the commitment of insuring abundant forest resources, wildlife diversity and recreational opportunities for future generations.

A working forest is a healthy forest. This message is as true today as it was when my grandfather served as chairman of the first Paul Bunyan Forestry Exposition (now PBS) in McArthur, Ohio 1957. There was certainly more timber growing in Ohio in 1957 than stood after the westward expansion of the mid 1800's. Today, there is more timber growing in Ohio than grew in 1957. Through a diverse membership, OFA is committed to education and will continue our legacy of bringing together private landowners, tree farmers, foresters, schools, government agencies and industry to share in the responsibility of sustainable and wise use of Ohio's natural resources.

With over 140 exhibitors, the 2019 Paul Bunyan Show represents all aspects of the forest products industry. See the latest timber harvest equipment demonstrations, attend one of many educational sessions, and enjoy the day with friends and family while eating great food and watching one of the exciting competitions. We thank each of our sponsors and exhibitors for making the show a continued success.

On behalf of our staff and board of directors, we welcome you and hope all enjoy the 2019 Paul Bunyan Show.

Sincerely,

**Adam Conway, President**  
Ohio Forestry Association

# HANK SOMERO, 1967-2019, CARVED AN IMPRESSIVE LOGGING LEGACY

The logging community is mourning the loss of Hank Somero, a well-respected sawyer and frequent participant in The Paul Bunyan Show, where he ran a sawmill for Baker Products in the Portable Sawmill Shootout for many years.

In 2017, Hank set a record in the Shootout at The Paul Bunyan Show with the Baker Blue Streak Portable Band Saw Mill 3665D. He and his teammate, Clay Hedrick, cut 587 board feet in just 22 minutes. That's an hourly rate of 1,621 board-feet.

When he wasn't competing, Hank worked as a sawyer at Hank Somero & Sons Custom Sawing in New Ipswich, New Hampshire. He was known for his ability to selectively cut trees on wood lots and use the harvested trees to frame and build custom homes for the property owners.

Hank died after a logging accident in March 2019. He was 52.

Hank was born in Vancouver, Washington, but he spent most of his life in New Hampshire. He worked as a contractor before opening his sawmill.

While his work required him to be outside, he also enjoyed the outdoors in his free time. He loved to fish, kayak and snowshoe with his children and grandchildren.

Hank is survived by his wife, Cindy Somero, a daughter, three sons, three grandchildren, and all 14 of his brothers and sisters.

# MEET CHAMPION ATHLETE JASON LENTZ TODAY!

Champion Power Equipment lumberjack Jason Lentz is looking forward to meeting you at an autograph-signing session at The 2019 Paul Bunyan Show on Saturday at 10:30am in Exhibit Hall 2.

Born in 1985, Jason grew up in a small town called Diana in Webster County WV. Throughout his childhood, he watched his father Melvin Lentz—The King of Lumberjacks—compete all over the United States. Jason competed in his first event at the Webster County Wood Chopping Festival. It was the first Junior Division Championship held in the U.S., and Jason came out with a win. Timbersports runs in the Lentz family—one of the oldest names in the sport—dating back to the early 30's. Jason is a 4th generation lumberjack. Jason Lentz competed for the first time in The Stihl Timber Sports Series in 2010 and has been competing professionally ever since.

# THE 2019 SEMINARS

Presented in the Sawmill & Woodlot Seminar Building

Independent Sawmill & Woodlot Management magazine is pleased to partner with the Paul Bunyan Show to bring this series of enlightening seminars to Ohio. Take advantage of these popular & educational classes presented by Brian Bond of Virginia Tech. Topics this year cover a full spectrum—from Logs to Lumber. You can enroll at the Paul Bunyan Show Office today prior to classes.

## A MIND-BENDING OPPORTUNITY! THE SAWMILL SEMINAR SERIES • TOPICS AND TIMES

### FRIDAY, OCT. 4TH

**9:30 - 11:00 AM**

#### Hardwood Log Grading

When purchasing or selling logs, you must first determine its value, which requires estimating the volume, quality and value of potential products produced. This session includes a field portion where the techniques will be applied. Those attending should come prepared with a measuring tape and something to write with. A calculator may also be useful.

**12:30 - 2:00 PM**

#### Introduction to Sawing Logs Using Different Techniques

(Part 1) Various sawing patterns are used to maximize the value of material produced from a hardwood log. Different sawing methods and the best way to apply each will be discussed, including live sawing, cant sawing and grade sawing.

**3:00 - 4:30 PM**

#### Exercise for Sawing Different Techniques

(Part 2) The various sawing patterns discussed in "Introduction to Sawing Logs Using Different Methods" will be applied to hardwood logs. Participants will apply the knowledge gained in the first session during sawing exercises.

### SATURDAY, OCT. 5TH

**9:30 - 11:00 AM**

#### Specialty Sawing

The most common specialty sawing techniques include quarter sawing and rift sawing. This session will discuss several methods for producing quarter sawn and rift sawn lumber and the unique properties of these types of materials. The session will also include a sawing demonstration.

**12:30 - 2:00 PM**

#### Lumber Grading

When selling hardwood lumber, there must be a consistent way to estimate its value. This seminar will introduce participants to the standard grading rules of National Hardwood Lumber Grading and demonstrate how they are applied. Participants are expected to participate in the application of the grading rules. Bring a calculator and something to write with.

**3:00 - 4:30 PM**

#### Intro to Lumber Drying

The price of properly kiln-dried lumber is often double the price of green lumber and being able to supply dry lumber increases the number of markets that one can sell to. This seminar will cover the basic information that a small operator should know and consider regarding the drying of hardwood and softwood lumber including suggested drying methods and equipment for small operators, the basics of how wood dries and defects associated with drying.

Seminar Presenter is **Brian H. Bond**, Professor & Extension Specialist in the Dept of Sustainable Biomaterials at Virginia Tech.

Register for seminars at the Paul Bunyan Show office today. Stop by the *Sawmill & Woodlot* magazine booth (H-22) for a **FREE ISSUE!**

## THE FUTURE OF PROFESSIONAL CUTTING, HUSQVARNA 572XP

### 12% HIGHER CUTTING CAPACITY

New engine design offers a wide usable RPM range for peak performance even under heavy loads. 12% higher cutting capacity (compared to previous models in the same cc range) makes the 572 XP® ideal for productive operation – even when using long guide bars.

### EXCELLENT COOLING CAPACITY FOR A LONGER ENGINE LIFE

Our new cooling system is optimised in every detail to give you a reliable chainsaw for any situation.

### THE 572 XP® IS EQUIPPED WITH NEW STATE-OF-THE-ART FILTRATION SYSTEM

572 XP® carries a large surface, heavy duty filter for longer and better filtration. This filter has a larger filtration area compared to previous generations, providing the chainsaw a healthier engine optimised for long working hours.

### EXCELLENT POWER TO WEIGHT RATIO

Weighing just 14.5 lbs and with its powerful 5.8 hp engine, the 572 XP® has a better power-to-weight ratio than any Husqvarna saw with similar displacement.

### 10 TIMES QUICKER AIR/ FUEL MIX ADJUSTMENT

AutoTune™ ensures a correctly tuned engine setting and optimised engine performance in all conditions.

## TESTED TO PERFECTION

With outstanding cutting performance, excellent cooling capacity and state-of-the-art filtration, the 572XP is built for productivity, reliability and durability, day after day.
